

# Henry Winning & Co.

QUALITY TWINES SINCE 1880

The TruNet Group is delighted to welcome Henry Winning & Co to the Group following the 2015 acquisition.

Henry Winning & Company is one of Europe's leading twine and string manufacturers. The company has been producing quality twine and string for over 135 years.

1 million metres of string and twine is produced each and every day from our 'Grade A' BRC accredited UK factory.

With this unrivalled experience Henry Winning provides a complete range of natural and synthetic twines in a huge variety of colours, sizes, thicknesses and specifications including many custom one-of-a-kind products for a multitude of packaging and food requirements.

Henry Winning products are used in butchery, packaging, sewing, baling, craft and gift, general food and recycling industries.

"The only BRC accredited Twine Manufacturer in the UK"

World leaders in the manufacture and supply of Elastic Netting, Elastic and Non-Elastic Twines and Trussing Loops.

With history going as far back as 1880, The TruNet Group are recognised as innovative leaders in the production of elastic netting, loops and twines.

The TruNet Group is truly International, operating globally with manufacturing sites located in England, Scotland, Poland, Vietnam and North America. It's manufacturing sites produce netting 24 hours a day with around 100 million metres of net produced globally. In addition, TruNet is the only netting manufacturer in the world with BRC accreditation at multiple sites.

Through their use of cutting edge technology, large scale production and an innovative research and design team, TruNet ensures that customers benefit from low costs, unrivalled quality and an extensive range of products that are responsive to the diverse needs of its growing customer base.

World leaders in the manufacture of elastic netting, trussing loops and twines for the food industry.

The TruNet Group's patented **Total Control Net**, is the world's only elastic netting with a pre-set fixed diameter. This unique product is a revolution in netting technology.

### The benefits of using Total Control Net...

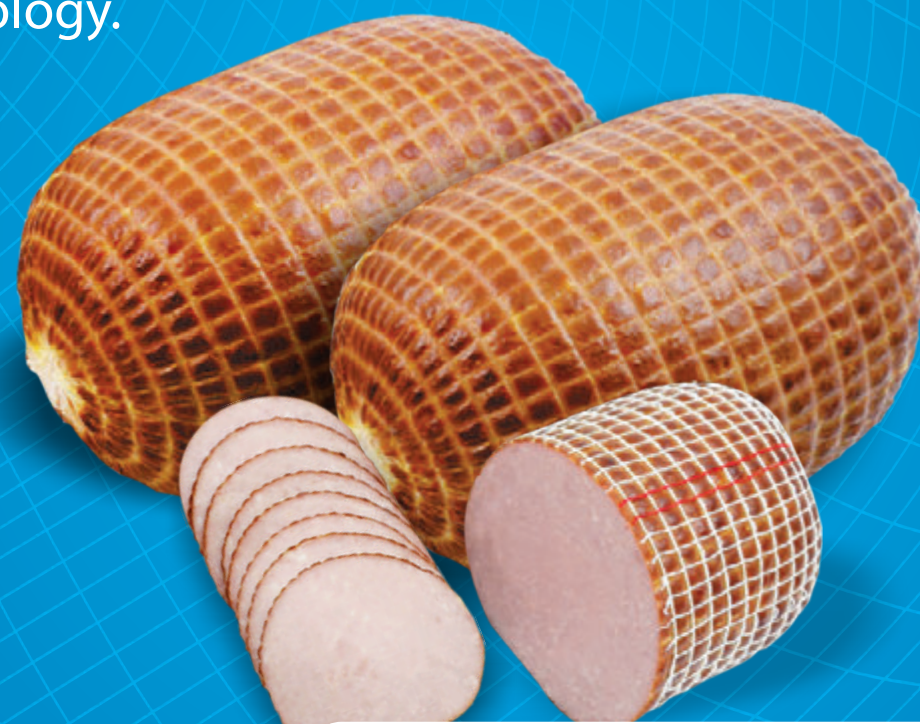

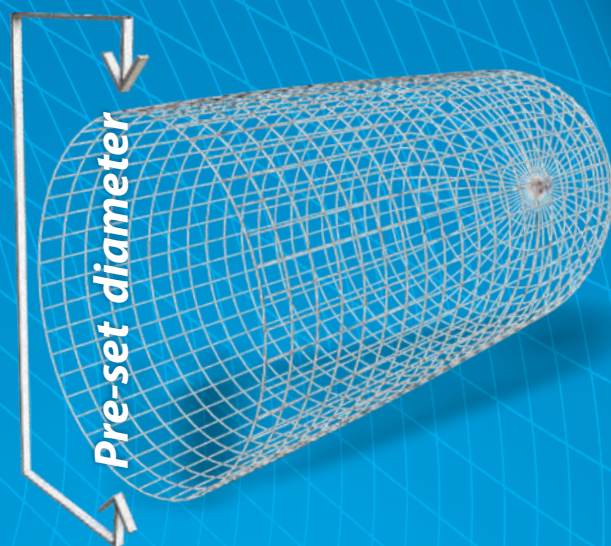

- Preset calibre netting
- The control of a casing, the power of netting
- A netting that eliminates variation in product size
- Control the maximum diameter of your products before netting
- Achieve higher yields
- Saves money
- Suitable for whole muscle and emulsified ham production
- Emulsion stuffing with TCN and Collagen Foil, aids high speed production and increases productivity whilst reducing breakages

### Increased product yield

Unbeatable cavity removal when used with a mechanical press.

[www.totalcontrolnet.com](http://www.totalcontrolnet.com)

### Applications

- Cooked ham.
- Dry-fermented sausage, European style.
- Semi-dried salami.
- Perfect for all meat types.

### Poultry Loops

Poultry Loops are made from food grade rubber threads, covered in Cotton or Polyester in a variety of colours and lengths.

Packed Neatly!

### Heat Sealed Loops

A revolutionary new trussing loop exclusively from **TruNet**.

### Adamas Nettings

These are a range of elastic and non-elastic diamond and hexagon nettings that are perfect for presentation and for dried sausages and meats.

### Conventional Netting Range

The TruNet Group is proud to have played a leading role in new product developments which has resulted in one of the widest ranges of quality nettings and loops available.

### Netting Strengths

Available for Roast and Boil Applications.  
Available in all of our colour variations.  
All available in 4, 6, 8, 12, 16, 18, 24, 32, 36, 48, 64, 72, 96 squares.  
Available in a range of sizes 50mm > 300+mm.  
We also offer a full range of cotton nettings and a wide variety of roastable colours.

### Quality Assurance

...is supported by computerised testing equipment. Proprietary remote controlled data logging and sophisticated packaging systems provide full traceability. Metal detection systems are also used on all products.
